

RUBBERMAID 60.9 CM MICROFIBER DAMP ROOM MOP, BLUE

HYGEN™ Microfiber stands as a proven solution, eradicating 99.7% or more of tested viruses and bacteria with water alone*, thereby curbing cross-transmission and diminishing the threat of healthcare-associated infections. Engineered with a patented zig-zag design, comprising polyester and polypropylene, it offers enhanced scrubbing power. Its optimised face material construction strikes a balance between drag force and cleaning efficacy, ensuring effortless cleaning. Tested to endure 500 launderings per CDC guidelines in hot water (71.1°C) or 200 with chlorine bleach, it maintains its effectiveness over time. Furthermore, its colour-coded edge tape fosters organised cleaning practices, mitigating cross-contamination risks by encouraging designated colours for different areas or tasks.
