

RUBBERMAID 45.7CM MICROFIBER FRINGED DUST MOP

The HYGEN™ Microfiber Dust Pads with Fringe are meticulously crafted to assist healthcare facilities in mitigating the risk of costly Healthcare-Associated Infections (HAIs) by fostering cleaner and safer environments. With high-quality, 16-split microfiber, these pads ensure a superior clean by effectively penetrating deeper to trap and lock away dust, dirt, and debris. The patented zig-zag design, composed of polyester, enhances scrubbing power, while the fringed edges offer significantly greater surface area compared to non-fringed dust mops, enabling faster cleaning. The industry-leading loop back, constructed of 100% polyester, securely attaches to the frame, even after laundering, ensuring lasting performance and reliability.
