

RUBBERMAID 91.4CM MICROFIBER FRINGED DUST MOP

The HYGEN™ Microfiber Dust Pads with Fringe are expertly crafted to support healthcare facilities in minimising the risk of costly Healthcare-Associated Infections (HAIs) by fostering cleaner and safer environments. Featuring high-quality, 16-split microfiber, these pads ensure a superior clean by effectively penetrating deeper to trap and lock away dust, dirt, and debris. The patented zig-zag design, constructed from polyester, enhances scrubbing power, while the fringed edges offer a significantly larger surface area compared to non-fringed dust mops, facilitating faster and more efficient cleaning. The industry-leading loop back, made of 100% polyester, ensures a secure attachment to the frame, even after laundering.
