

PACIFIC SLIM TOWEL PREMIUM TAD

The Pacific Slim Towel Premium TAD is a top-tier hand towel crafted using advanced Through-Air Drying (TAD) technology, which enhances its absorbency, strength, and softness. This innovative process uses heated air instead of traditional pressing, creating a lightweight structure designed to soak up moisture quickly while maintaining durability even when wet. The result is a towel that dries hands faster, reduces waste, and provides a noticeably softer and more comfortable user experience.
